

Designed for the most discriminating underwater videographer, the AV-MC-HC1/A1 is a rugged, reliable, high quality and very cost effective Marine Case for the Sony HDR-HC1 and HVR-A1 ultra compact High Definition camcorders. Suitable for wet weather, water sports and underwater video applications to depths of 80 meters/275 feet, it is compact, easy to set up, and easy to use. Supplied with our new high resolution wide angle conversion lens it provides an extreme wide angle of view – for dramatically clearer, more colorful underwater pictures. The dome port optical system corrects for distortions and aberrations that would otherwise occur, yet true, magnified macro and zooming functions are still possible. An optional underwater color correction filter is also available that restores a natural color balance, providing rich saturated colors - even at depth. The HC1 provides white balance override which will suit many users' needs. Those requiring settable white balance should consider the HVR-A1 which, in addition to cinegamma, cineframe and other features, has a user button which can be set to do white balance and is easily accessible in the housing.

One of the most important features of the AV-MC-HC1 is the use of patented X-ring seal technology. The X-ring seal provides double sealing for extremely high reliability. Clear endplates allow the user to clearly see the seals to easily verify that the seal has been made - before entering the water - and throughout the dive. The clear backplate also provides superior visibility of the camera's LCD screen which is opened inside the housing for exceptional visibility over enclosed aluminum housings and makes an accessory LCD unnecessary. The housing also provides excellent functionality for the camera's 2.8 megapixel still mode.

- Ultra Compact, Professional High Definition underwater video sys
- X-ring double main seals for high reliability.
- Clear 1" Acrylic Endplates for Full visibility of main seals.
- High resolution, fully corrected, dome port underwater optics.
- Heavy wall high grade PVC cylindrical main body combines the most pressure resistant design with a rugged and completely corrosion proof material.
- Stainless steel closure clamps provide quick and easy installation and removal of the camcorder, with a spring loaded safety locking feature, to prevent accidental opening.
- Control of major video camera functions, as well as 2.8 megapixel still camera function. Settable white balance on HVR-A1.
- Optional SuperNova 250w light. Battery that fits inside housing!

AquaVideo AV-MC-HC1/A1

- For: Sony HDR-HC1 HiDef camcorder - also HVR-A1 pro version
- Weight: 9.8 lbs. (16 lbs. w/underwater ballast weight)
- Length: 11.2 inches.
- Diameter: 7 inches.
- Displacement: 19.8 lbs. (This is the total weight of the system with camcorder, battery, wide angle lens, housing and ballast weight for underwater use.)
- Depth Capability: 80 Meters/275 feet.
- Standard Controls: Power, Trigger, & Zoom, Auto/Manual Focus, Photo shot control for stills, mode select control (Settable White Balance, Manual focus control, nightshot etc. are available)

Price: \$ 1499.00 (wide conversion lens included)
 Price for the HVR-A1 "pro" version is \$1649 and includes controls for exposure and the user set button which can be set to do white balance. Either camera will work in either housing.

- Optional SuperNova 250 compact Underwater Lighting System: \$ 1399.00 (inc. 24 Volt NiMH Battery, Lamphhead, Charger)
 Battery fits inside housing with cable to external lamphhead which allows use of 50, 75, 100, 150, 200, and 250 watt tungsten bulbs. Equivalent to 125 watt HID or 65 watt HID even with filter to correct to daylight color temperature. Battery and lamphhead weight replace ballast weight, so the overall weight/size is unchanged, making a phenomenally compact, complete professional HD housing/lighting system.
